

DenOptix QST

DenOptix QST Digital made easy!
DenOptix Photostimulable Phosphor Plate technology (PSP) delivers all the benefits of digital with the simplicity of film.

What is PSP?

- Digital PSP solutions eliminate the traditional film processor and deliver the size range and flexibility of traditional film in a digital format
- PSP easily converts existing film based panoramic (cephalometric) systems to digital
- [Click here to learn more about PSP solutions](#)

Why DenOptix QST?

- Delivers maximum productivity, unmatched flexibility and superior reliability
- Clean, fast, chemical free digital processing
 - Reliable, consistent digital image output
 - Improved patient comfort with wireless, flexible and thin imaging plates
 - Positions like film and delivers ease of integration
 - Delivers digital imaging to entire practice in one simple, economical step

Maximum productivity

Provides maximum productivity
DenOptix QST provides maximum productivity for busy offices with its easy installation and minimum staff training. The decision to go digital offers offices the perfect opportunity to replace inefficient and cumbersome film processing. Benefits include:

- Decreased processing time and duplication time
- Significant cost and time savings- no more film processor maintenance and repair
- Improved customer satisfaction-offers consistent and highly diagnostic images each time

Unmatched flexibility

Offers unmatched flexibility
DenOptix offers not only excellent image quality and fast digital scanning but also delivers the flexibility to practice dentistry in the way that most offices want. DenOptix QST is uniquely designed to scan multiple images in seconds in the most popular intraoral and extraoral sizes in one single step.

All over the world, thousands of practices have relied upon the DenOptix system.

Technical Data

Description	
Interface cables	USB 2.0
Voltage	100-240 V. AC
Frequency	50/60 Hz
Power	100 watts maximum
Laser Classification	Compliance per DHHS radiation performance standards 21 CFR. Ch.1. Subch.J: EN60825-1 Class 1 Laser device
Weight (empty)	15 kg/32 lbs
Computer Recommendation	
CPU speed	2.4 GHz Pentium IV or higher
Operating system	Windows XP PRO
RAM	256+ MB
USB port (required)	USB 2.0
Hard drive	40+ GB
Monitor	17" with 0.25 mm dot pitch
Video display adapter	8 + MB RAM
Display setting	1024 X 768 true color
